

# Diversity of Thought that WORKS

Learn how to use the most transformative methodology and assessment to measure and leverage your team's valuable thinking, Whole Brain® Thinking and HBDI®

When you lead with Diversity of Thought, you capitalize on the diversity that already exists in your organization, leading to a positive impact on your bottom line.

Individuals, teams and organizations who leverage Diversity of Thought are:

- More Responsive
- More Collaborative
- More Productive

**LET US SHOW YOU THE POWER OF DIVERSITY OF THOUGHT IN A HALF-DAY WORKSHOP**

Teams with Diversity of Thought are 66% more effective than teams with homogenous thinking preferences

## Learning Objectives for Managers and Leaders:

**Self:** Understand and leverage your thinking preferences to maximize your individual effectiveness, productivity and career.

**Others:** Use diversity of thought to provide inclusion opportunities for direct reports and those you coach or mentor – all of which may impact engagement, productivity, tenure and mobility.

**Teams/Enterprise:** Capture and include diverse perspectives to envision, innovate and energize teams, the organization and your clients/customers.

*This program design will include personal reports for individual and group HBDI® data, the Return on Inclusion survey and the development of an action plan for applying Diversity of Thought.*

**How can you make the most of your diverse team without the power to leverage their different perspectives?**

Herrmann International is the originator and creator of the ground-breaking Whole Brain® Thinking System and HBDI®. Since 1985, Herrmann has helped 97% of the Fortune 100 and 2 million Thinkers improve their lives at work. We help clients tackle tough challenges by teaching them how to leverage their thinking in new and better ways.
