

# BrainAbility

BETTER BRAIN. BETTER TEAM. BETTER BUSINESS.

## The Gibson Test of Cognitive Skills

*NOT JUST ANOTHER ASSESSMENT*

**Did you know that struggles with thinking, learning, reading, changing, memory and attention are often caused by weak cognitive skills?**

If you or someone in your team is struggling in one or more of these areas, or simply want to know how your current cognitive brain skills are performing, The Gibson Test of Cognitive Skills is the right place to start.

The Gibson Test meets the highest scientific standards, and has been administered more than 100,000 times since 1999.

It is a non-invasive assessment, and has been validated and normed twice by experts in the fields of learning and cognition.

It is one of the few cognitive assessments that measure a wide range of cognitive skills - the core skills the brain uses to think, learn, and perform at work and in life.

### What the Gibson Test measures

The Gibson Test of Cognitive Skills scientifically measures the performance of the following key cognitive skills:

- Short-term and Long-term Memory
- Processing Speed
- Auditory Processing
- Visual Processing
- Logic & Reasoning
- Attention
- Word Attack skills (not a cognitive skills but essential for fluent reading)

The above have a combined impact on your ability to change.
